

Instruction To Run Application

1.Backend Environment Configuration

i.Navigate to your backend directory:

```
Bash  
cd backend
```

ii.Run installation to pull core dependencies:

```
Bash  
npm install
```

iii.Create a .env configuration file in the backend root directory and supply your local parameters:

```
Code snippet  
PORT=5000  
JWT_SECRET=your_secure_jwt_secret_phrase  
DB_HOST=localhost  
DB_USER=root  
DB_PASSWORD=your_mysql_root_password  
DB_NAME=store_rating_db
```

iv.Boot the server using Nodemon development mode:

```
Bash  
npm run dev
```

3. Frontend App Launch

i.Open a new terminal instance and navigate to your frontend workspace directory:

```
Bash  
cd frontend
```

ii.Install client dependencies:

```
Bash  
npm install
```

iii.Launch your interactive React application:

```
Bash  
npm run dev
```
